## A-Z Vocabulary

1. You can use place-value blocks to help you find **partial differences**.
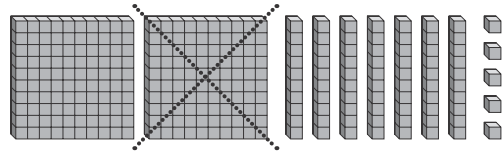

These blocks show _____.

Circle the **ones** blocks with red, the **tens** blocks with blue, and the **hundreds** with green.

**2.** Find $275 - 116$. Look at the models on the right.

You can subtract _____ hundred from _____ hundreds.

$$275 - 100 = \underline{\qquad}$$

Subtract _____ ten from __7__ tens.

$$175 - 10 = 165$$

Subtract __6__ ones.

First, subtract __5__ ones to make a ten.

$$165 - \underline{\qquad} = \underline{\qquad}$$
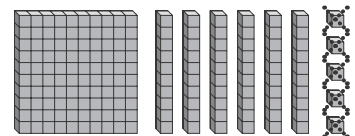

Regroup 1 _____ as 10 _____.

Subtract _____ more of the ones.

$$\underline{\qquad} - \underline{\qquad} = \underline{\qquad}$$

So, $275 - 116 = \underline{\qquad}$.

On the Back!

3. Use place-value blocks and partial differences to find $745 - 361$. Show drawings of your blocks. Regroup if you need to.
